MUHAMMAD HASEEB

AI / MACHINE LEARNING ENGINEER

LinkedIn : https://www.linkedin.com/in/muhammad-haseeb-9b8364326/ | GitHub: https://github.com/MuhammadHaseeb54

PROFESSIONAL SUMMARY

AI/ML Engineer with hands-on experience in NLP, Generative AI, RAG, and LLM-based applications. Skilled in developing end-to-end ML solutions, from data preprocessing and model evaluation to production API deployment using Python and FastAPI. Experienced in semantic search, vector databases, and building scalable AI systems.

TECHNICAL SKILLS

Programming: Python, SQL

AI & Generative AI: NLP, Generative AI, LLMs, RAG, Scikit-learn

Data Analysis: Pandas, NumPy, Matplotlib, Seaborn

Frameworks & APIs: FastAPI, Flask, REST APIs

Databases: PostgreSQL, MySQL, FAISS, Vector Databases

Tools & Platforms: Docker, Git, Jupyter Notebook, VS Code

EXPERIENCE

AI/ML Engineer — Developer Hub Corporation *May 2025 – Aug 2025*

- Designed and implemented end-to-end ML pipelines covering data preprocessing, model training, validation, and monitoring.
- Reduced model drift by introducing stronger data validation and preprocessing checks.
- Collaborated with backend and cloud teams to deploy models via APIs and improve inference performance.

Data Science Intern — Prodigy InfoTech *Feb 2025 – Apr 2025*

- Performed EDA, NLP preprocessing, and sentiment analysis on structured and unstructured datasets using Python and Scikit-learn.
- Cleaned datasets affected by missing values, noisy text, and class imbalance.
- Enhanced reporting and business insights through data visualization, model evaluation, and collaborative analytics workflows.

PROJECTS

RAG-Based E-Commerce Intelligence System *RAG, FastAPI, React, PostgreSQL, Sentence Transformers*

Developed a RAG-powered e-commerce platform enabling semantic product search, contextual recommendations, and AI-driven customer assistance using vector embeddings, LLM workflows, and scalable API infrastructure.

AI Resume Intelligence Platform *RAG, FastAPI, LangChain, FAISS, REST API, PostgreSQL*

Built an AI-powered recruitment platform for resume parsing, semantic job-description matching, ATS-based candidate scoring, skill-gap analysis, and interview-question generation using NLP pipelines and scalable REST APIs.

Enterprise ERP Management System *Next.js, NestJS, TypeScript, PostgreSQL, Prisma, JWT*

Developed a Built a full-stack ERP platform for employee management, inventory tracking, workflow automation, analytics dashboards, and secure business operations using scalable backend APIs and authentication systems.

Research Paper Summarizer (NLP + Hugging Face) *Transformers, NLP, FastAPI, Hugging Face*

Developed an AI-based research summarization system that extracts key insights and generates concise summaries from academic papers using transformer-based NLP pipelines and API-driven workflows.

AI Sales Assistant *FastAPI, OpenAI API, React, PostgreSQL*

Built an AI-driven sales assistant for customer interaction, lead qualification, conversational product recommendations, and automated response generation using LLM workflows and REST APIs.

EDUCATION

BS Artificial Intelligence *(2023 – Present)*

Superior University, Lahore

CERTIFICATIONS

- Google Machine Learning Crash Course — Google
- Python Programming Certification
- SQL Certification Course

ACHIEVEMENTS

- **Participant** — Tech Titan Trivia Competition
- **Participant** — Huawei ICT Competition
